

PROBLEM

Georgian high-school students spend **days** searching for an exam-prep tutor through fragmented WhatsApp and Telegram group chats — no visibility into tutor availability, rates, or subject coverage. **No Georgian-language tutoring platform exists.**

SOLUTION

TutorLink is a two-sided marketplace: students find verified exam-prep tutors, book sessions, attend HD video lessons with a shared whiteboard, and submit homework for AI-graded feedback — in Georgian or English.

TRACTION

- **10** waitlist signups (5 students + 5 tutors) — one evening of outreach
- **Full MVP live** at [tutoring-lyart.vercel.app/en](#) — 10 stories, 12 DB migrations
- **5** usability test users · PostHog analytics live in production (EU region)

MARKET · BOTTOM-UP

TAM	■120M/yr	50k exam students × ■2,400/yr
SAM	■36M/yr	30% willing to go online
SOM Y1	■50,400	200 students/mo × 24 wks

BUSINESS MODEL

Commission	15% per completed lesson
Revenue/lesson	■5.25
Student LTV	■252
CAC (referral)	■1.32
LTV : CAC	143 : 1
Payback	< 1 lesson

GO-TO-MARKET

- P1 Tutor referral loop
- P2 Telegram exam communities
- P3 Instagram / TikTok

COMPETITION

Preply, iTalki, Tutorful — all English-first, no Georgian UI, no national exam syllabus alignment. WhatsApp groups are the real incumbents: unstructured and manual.

MOAT

Network Economics (Helmer) — tutor referral loop: more tutors → more students → more tutor revenue → more referrals. Combined with Georgian UI + exam syllabus alignment.
